[LinkedIn](#) | [GitHub](#)

As a frontend developer, I create modern, responsive, and user-friendly interfaces using HTML, CSS, Bootstrap, and JavaScript (particularly React). I focus on transforming client visions into functional solutions that align with brand identity and work seamlessly across all platforms.

I have experience working in multidisciplinary teams, managing projects from concept to delivery, and meeting tight deadlines. I'm passionate about staying up to date with the latest frontend trends and technologies to deliver innovative and effective solutions.

Güncelleştir Grup | Graphic Designer

İstanbul, Turkey | Sep 2021 – Dec 2021

- Designing a business card in Coreldraw.
- Designing a logo on Adobe Photoshop.
- Designing signboard and poster.

PROJECTS

- **Restaurant Reservation System**

A web application that allows users to make table reservations based on specific dates and times. The frontend was developed using HTML, CSS, Bootstrap, and JavaScript, while the backend was built with Java Spring Boot.

As the frontend developer, I was responsible for creating the user interface, managing page transitions, building the reservation form, and implementing responsive design.

Project Github Link: <https://github.com/solinmrd/restaurant-reservation>

- **Interpretership – Translation Services Website**

This static website was designed with a clean and modern interface to reflect the corporate identity of a translation services company. Built using HTML, CSS, and JavaScript, the site includes general company information, an overview of provided services, and a contact section.

I designed and developed the entire frontend to be user-friendly, responsive, and mobile-compatible.
